Contents

PLENARY SESSION

Epitaxial growth and doping of and device development in monocrystalline β-SiC semiconductor thin films 1
R. F. Davis (Raleigh, NC, U.S.A.)

THIN FILMS FOR MICROELECTRONIC, SUPERCONDUCTING AND INFORMATION STORAGE APPLICATIONS

Fundamental studies of surfaces and interfaces in VLSI materials

Surface and interface analysis for the development of VLSI devices. 17
M. Grasserbauer (Vienna, Austria)

Preparation and characterization of multilayer metallization structures with titanium nitride and titanium silicide 35
P. Panjan, B. Navinšek, A. Žabkar, D. Mandrino, M. Godec, M. Koželj, Z. Krivokapič and A. Zalar (Ljubljana, Yugoslavia)

Use of temperature to study the nature of interface states and Fermi level pinning with metals on GaAs(110) 43
R. Cao, K. Miyano, I. Lindau and W. E. Spicer (Stanford, CA, U.S.A.)

Isothermal annealing of hillocks in Al–Cu films 57
C. Y. Chang, R. W. Vook and Y. C. Lee (Syracuse, NY, U.S.A.) and I. Hoshi (Fukushima, Japan)

Laser ablation deposition of titanium films on silicon substrates at room temperature 65
O. Auciello and A. F. Schreiner (Raleigh, NC, U.S.A.), T. Barnes, S. Chevacharoenkul and G. M. McGuire (Research Triangle Park, NC, U.S.A.)

Materials applications in VLSI technology

Chemical vapour deposition of oxide and metal films for VLSI applications . 75
K. Hieber, H. Körner and H. Treichel (Munich, F.R.G.)

Low pressure chemical vapor deposition of blanket tungsten using a gaseous mixture of WF_6, SiH_4, and H_2. 85
H. L. Park, S. S. Yoon, C. O. Park and J. S. Chun (Seoul, Korea)

Ion-implant-enhanced reflow of phosphosilicate glass films 95
F. Malik (La Jolla, CA, U.S.A.) and W. Kern (San Diego, CA, U.S.A.)

Magnetic, magneto-optic, and phase change recording media

R.f.-diode sputtered amorphous rare earth–transition metal films: microstructure, stability, and magneto-optical properties 101
H.-P. D. Shieh (Pittsburgh, PA, U.S.A.), M. Hong and S. Nakahara (Murray Hill, NJ, U.S.A.)

Modeling studies of rare earth–transition metal recording media in relation to experiment 115
B. J. Bartholomeusz and T. K. Hatwar (Rochester, NY, U.S.A.)

Progress and issues of phase-change erasable optical recording media 129
K. A. Rubin and M. Chen (San Jose, CA, U.S.A.)

Magneto-optic response of a thin magnetic film on a transparent substrate . . 141
V. W. Biricik and F. R. Nakatsukasa (Palos Verdes, CA, U.S.A.)

Synthesis and characterization of high T_c superconductors

Low temperature growth and properties of YBCO single crystal films 147
Y. Bando, T. Terashima, K. Iijima, K. Yamamoto and K. Hirata (Kyoto, Japan), T. Takada (Okayama, Japan), K. Kamigaki and H. Terauchi (Nishinomiya, Japan)

Effect of deposition conditions on cation composition during reactive magnetron sputtering of high-T_c superconductors 157
S. I. Shah (Wilmington, DE, U.S.A.)

Effects of lead on the formation of the 2223 phase in Bi–Sr-Ca–Cu–O films . 165
N. R. Osborne, S. K. Dew, P. J. Mulhern and R. R. Parsons (Vancouver, BC, Canada)

Properties of superconducting $Tl_2Ba_2Ca_2Cu_3O_{10}$ films by sputtering 173
M. Hong, J. Kwo, C. H. Chen, A. R. Kortan and D. D. Bacon (Murray Hill, NJ, U.S.A.) and S. H. Liou (Lincoln, NE, U.S.A.)

Interaction of $RBa_2Cu_3O_x$ ($R \equiv$ Y or Nd) coatings with alumina and zircona substrates 181
C. Moreau, L. Parent, B. Champagne and S. Dallaire (Quebec, Que., Canada)

Influence of ion-irradiated $SrTiO_3$ on the properties of thin film oxide superconductors 191
N. Bordes, M. Cohen, M. Nastasi, A. D. Rollett and C. J. Maggiore (Los Alamos, NM, U.S.A.)

Superconducting phase control for the high-T_c superconducting thin films . . 199
K. Wasa, M. Kitabatake, H. Adachi, K. Hirochi, Y. Ichikawa and K. Setsune (Moriguchi, Japan)

Compound semi-conductor, heterostructure and superlattice thin films

Selected area heteroepitaxial growth of GaAs on silicon for advanced device structures 213
R. J. Matyi and H. Schichijo (Dallas, TX, U.S.A.)

The effect of substrate bias on the growth of PbTe films deposited onto BaF_2 by r.f. magnetron sputtering 227
S. R. Das, M. Phipps, W. E. Boland and J. G. Cook (Ottawa, Ont., Canada)

Thin film materials for integrated sensors

Microsensor and microactuator applications of thin films 235
R. T. Howe (Berkeley, CA, U.S.A.)

Design and fabrication of a silicon-P(VDF–TrFe) piezoelectric sensor 245
A. Lee (Pasadena, CA, U.S.A.), A. S. Fiorillo and P. Dario (Pisa, Italy), J. van der Spiegel and P. E. Bloomfield (Philadelphia, PA, U.S.A.) and J. Dao (Toronto, Ont., Canada)

Measurement of fracture stress, Young's modulus, and intrinsic stress of heavily boron-doped silicon microstructures 251
K. Najafi and K. Suzuki (Ann Arbor, MI, U.S.A.)

METHODS OF CHARACTERIZING COATINGS AND MODIFIED SURFACES

Surface and thin film analysis techniques

Ion beam analysis of multilayer structures grown with atomic layer epitaxy (ALE). 259
R. Lappalainen and J.-P. Hirvonen (Helsinki, Finland), P. J. Pokela and J. Alanen (Espoo, Finland)

A new model of surface precipitation of boron nitride on an austenitic stainless steel and its outgassing nature 267
D. Fujita and T. Homma (Tokyo, Japan)

AES depth profiling of a new type of multilayer structure composed of Cr/Ni layers of various thicknesses 277
A. Zalar and P. Panjan (Ljubljana, Yugoslavia) and S. Hofmann (Stuttgart, F.R.G.)

Film thickness measurements using ellipsometry when the lower interface is uncharacterized 285
H. G. Tompkins (Mesa, AZ, U.S.A.)

Recent developments in non-destructive testing of coated components 295
H.-A. Crostack, W. Jahnel, E. H. Meyer and K.-J. Pohl (Dortmund, F.R.G.)

Microstructural characterization techniques

Transmission electron microscopy of Ni/Ti neutron mirrors 305
A. F. Jankowski and M. A. Wall (Livermore, CA, U.S.A.)

Atomic imaging of Au/Ni multilayers 313
M. A. Wall and A. F. Jankowski (Livermore, CA, U.S.A.)

Microstructural information related to thin film optical measurements 323
E. E. Chain and D. M. Byrne (Richardson, TX, U.S.A.)

Preparation and characterization of ion-assisted amorphous NiTi(N) coatings 333
S. Raud, J. Delage, J. P. Villain and P. Moine (Poitiers, France)

Surface structure and properties of ion-nitrided austenitic stainless steels . . . 345
S.-P. Hannula and P. Nenonen (Espoo, Finland) and J.-P. Hirvonen (Helsinki, Finland)

Preparation of alloy thin films by the CAPD process 351
M. Otsu and E. Ko (Tokai, Japan), T. Yoshikawa and K. Tsuji (Japan)

Mechanical properties of films and coatings

Evaluation of mechanical properties of TiN films by ultralow load indentation 357
M. E. O'Hern, R. H. Parrish and W. C. Oliver (Oak Ridge, TN, U.S.A.)

Interpretation of the indentation size effect in Vickers microhardness measurements—absolute hardness of materials 365
G. Farges and D. Degout (Arcueil, France)

The structure of beryllium films 375
R. O. Adams and C. W. Nordin (Golden, CO, U.S.A.)

Fatigue strength of steels with thin hard coating 383
K. Saruki, S. Hotta, H. Fujita and T. Arai (Aichi-ken, Japan)

Some mechanics for the adhesion of thin films 397
M. D. Thouless (Yorktown Heights, NY, U.S.A.)

Fracture toughness measurement of plasma sprayed ceramic coatings 407
F. Beltzung, G. Zambelli and E. Lopez (Lausanne, Switzerland) and A. R. Nicoll (Wohlen, Switzerland)

Modification of surface mechanical properties of IBAD-CuNi coatings 417
J. von Stebut and K. Anoun (Nancy, France), J. P. Riviere and R. J. Gaboriaud (Poitiers, France)

Adhesion measurements of films and coatings

Surface-enhanced Raman scattering 423
F. J. Boerio (Cincinatti, U.S.A.)

Adhesion of optical coatings on a quartz substrate 435
F. Kimura (Kanagawa, Japan), S. Baba, A. Kikuchi and A. Kinbara (Tokyo, Japan)

Quantitative adhesion strength measurement of diamond coatings 443
M. Murakawa and S. Takeuchi (Saitama, Japan)

In-situ metallization of polypropylene films pretreated in a nitrogen or ammonia low-pressure plasma 451
V. André, F. Arefi, J. Amouroux and M. Delamar (Paris, France), Y. de Puydt and P. Bertrand (Louvain, Belgium) and G. Lorang (Vitry, France)

TRIBOLOGICAL COATINGS/SURFACE MODIFICATIONS

Reduction of friction through coatings/surface modifications

Ultralow friction films of MoS_2 for space applications 461
E. W. Roberts (Risley, U.K.)

Laser surface processing of molybdenum disulfide thin films 475
T. R. Jervis and M. Nastasi (Los Alamos, NM, U.S.A.), R. Bauer and P. D. Fleischauer (El Segundo, CA, U.S.A.)

Interfacial analysis of tribological systems containing molybdenum disulfide and iron using XPS and CEMS 485
J. S. Zabinski, T. George and B. J. Tatarchuk (Auburn, AL, U.S.A.)

Chemical and mechanical characterization of WC:H amorphous layers 497
W. van Duyn and B. van Lochem (Eindhoven, The Netherlands)

Wear resistance of ceramic, alloy and composite coatings

Wear reduction and sliding behaviour of various substrates obtained by ion implantation of nitrogen and carbon ions 505
F. J. Koerber, H. Petersein and H. Ranke (Hanau, F.R.G.)

Wear and friction of thin film high temperature oxide superconductors 515
M. Nastasi and J.-P. Hirvonen (Los Alamos, NM, U.S.A.) and R. O. Toivanen (Espoo, Finland)

Study of the microstructure of silver films deposited by ion-assisted deposition onto aluminum-oxide substrates 521
R. A. Erck and G. R. Fenske (Argonne, IL, U.S.A.)

Analysis and micromechanical testing of tribological coatings

Atomic force microscopy for the study of tribology and adhesion 527
E. Mayer, H. Heinzelmann, P. Grütter, Th. Jung, H.-R. Hidber, H. Rudin and H.-J. Güntherodt (Basel, Switzerland)

Multi-pass scratch testing as a model for abrasive wear 545
S. J. Bull and D. S. Rickerby (Harwell, U.K.)

Major damage mechanisms during scratch and wear testing of hard coatings on hard substrates 555
J. von Stebut, R. Rezakhanlou, K. Anoun, H. Michel and M. Gantois (Nancy, France)

SPECIAL TOPICS

Optical coatings: fabrication and characterization

Real-time and spectroscopic ellipsometry characterization of diamond and diamond-like carbon 565
R. W. Collins, Y. Cong, Y.-T. Kim, K. Vedam, Y. Liou, A. Inspektor and R. Messier (Pennsylvania, PA, U.S.A.)

Inversion of Rugate spectra 579
R. J. Becker and M. K. Kullen (Dayton, OH, U.S.A.)

Fabrication and characterisation of inhomogeneous optical thin films 589
R. W. Bertram, R. V. Lang, M. F. Ouellette and K. L. Yan (Whitby, Ont., Canada)

Process for high rate deposition of Al_2O_3 597
T. D. Schemmel, R. L. Cunningham and H. Randhawa (Boulder, CO, U.S.A.)

Synthesis of silicon nitride films using the ARE technique 603
J. S. Yoon, H. J. Doerr, C. V. Deshpandey and R. F. Bunshah (Los Angeles, CA, U.S.A.)
